

Remote Telemedicine Solutions

Oral Fluid Testing

Aegis Sciences Corporation offers providers the ability to perform oral fluid sample collections remotely during telemedicine appointments to allow for continued patient medication monitoring.

Patient medication monitoring is a crucial tool to measure prescription compliance and substance use. It is imperative to keep this essential tool available to clinicians to assist with care decisions during the COVID-19 pandemic and into the future as telemedicine becomes more widely used.

CONTINUED CARE
Definitive, accurate
alternative to urine

CONVENIENT
Simple specimen collection
anytime, anywhere

OBSERVED
Reduce the risk of
sample adulteration

Aegis offers two options for remote telemedicine oral fluid sample collections:

- Providers can perform collections remotely during their telemedicine consult
- Aegis specimen collectors can perform collections remotely for provider ordered tests
